Deep Tieback Anchor Installations for Slope Stabilization in Mississippi

by

John R. Wolosick, P.E.

Abstract

Two major landslide repair projects have recently been completed in the State of Mississippi: The Ameristar Casino Parking Garage and the US 61 South Slope Stabilization at Signal Hill. Both projects used high capacity drilled tieback anchors to depths greater than 250 feet. Tieback load capacities of more than 500 kips were achieved.

Time: 12:05 - 12:55 pm

Date: Friday, September 14th, 2007

Room: Mason 142A

John R. Wolosick is Director of Engineering for Hayward Baker Inc., Atlanta, Georgia where he covers projects nationwide and specializes in micropiling and underpinning, anchors, earth retention and landslide stabilization, and all types of grouting. He holds B.S. and M.S. degrees in Civil Engineering from the University of Illinois at Urbana-Champaign. He has more than 25 years experience in Geotechnical Engineering and Contracting. Mr. Wolosick is the author of more than 25 technical papers. He is a Registered Professional Engineer in nine Mid-Atlantic and Southern States as well as the District of Columbia. Mr. Wolosick Co-Chairs the ADSC Micropile committee and is Chairman of the DFI Micropile committee. He is also a member of the ASCE Earth Retaining Structures committee and Past-Chair of the ASCE Georgia Section Geotechnical Committee (2003-2005).
